EDUCATION

Acropolis Institute of Technology and Research

July 2023 – Present

Bachelor of Technology in Computer Science and Engineering (RGPV)

CGPA: 8.09

Indore, India

Relevant Courseworks : Data Structures and Algorithms, Object Oriented Programming, Software Engineering, Operating Systems and RDBMS

TECHNICAL SKILLS

- **Programming Languages:** Java, C/C++, Python
- **Frontend:** HTML5, CSS3, JavaScript, React.js, Redux, Bootstrap, Tailwind CSS
- **Backend:** Spring Framework, Spring Boot, RESTful APIs, Spring Security, Spring Data JPA, Hibernate, Spring AI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Developer Tools:** Git & GitHub, Postman, Maven, Swagger, IntelliJ IDEA, VS Code,
- **Software Concepts:** Object-Oriented Programming (OOP), Model-View-Controller (MVC), REST API Design, JSON/XML, Responsive Web Design, Unit Testing (JUnit, Mockito), Agile and Scrum Methodology

PROJECTS

Wealth Map 🗺️ | **Backend Developer - SpringBoot, PostgreSQL, Google Geocoding API,**

May 2025

- Engineered a real-time property search platform utilizing Spring Boot, PostgreSQL/PostGIS, and Leaflet, enabling bounding box and radius searches; driving 5000+ weekly active users.
- Executed secure role-based access module for company and employee management; reduced admin overhead by 30% through automated workflows.
- Implemented MFA, encrypted data storage, and access logging to meet GDPR/CCPA compliance; increased platform trust and reduced risk exposure.
- Integrated Google Geocoding API to resolve US addresses to coordinates; enhanced map accuracy by 99% enabling location-based services.
- Designed and optimized spatial indexing strategies using PostGIS GiST indexes; accelerated geospatial query performance by 70%, ensuring seamless user experience at scale.

Journal App 🗒️ | **Spring Boot, Spring Security, Redis, MongoDB, Swagger, JWT, Lombok**

November 2024

- Engineered a secure journal app using Spring Boot, MongoDB, Redis, and JWT, enabling CRUD operations with real-time caching, improving response time by 50%.
- Accomplished JWT-based authentication and role-based access control with Spring Security, securing 100% of endpoints.
- Integrated a weather API with intelligent caching to deliver personalized insights, enhancing user engagement by 25%.
- Applied Swagger/OpenAPI for live API documentation and testing, optimizing developer onboarding time by 40% and supporting long-term maintainability.
- Achieved 90% test coverage using JUnit and Mockito, refining code reliability and reducing bugs in production.

ACHIEVEMENTS & EXTRACURRICULARS

- Solved 200+ DSA problems across LeetCode, GFG, and CodeStudio, strengthening backend logic and algorithmic thinking.
- Shortlisted among top teams in Fueled 2.0 Hackathon (60+ teams) for prototype-based selection.
- Developed 3 Java-based projects during a 1-month internship at VaultOfCodes, collaborating with a **team of 4** and enhancing practical software development skills.

CERTIFICATIONS

- Certified in Java Programming and Data Structures & Algorithms from Infosys (2025)
- Successfully completed NPTEL certification in Analysis and Design of Algorithm scoring 51% (2024)
- Completed C, C++, and Java certifications through IIT Bombay's Spoken Tutorial program (2024)
